- **Quick apply** is free and easy to use. The system will email you when an applicant applies and allows you to email the candidate straight from the system.
 - This is ideal for any organization that does not have a dedicated ATS
- **Send applicants to another website**
 - You would like your application to the PHA job board.
 - This will send the candidate to your site to apply.
- **Manage manually though text instructions**
 - This would allow you to ask them to email you.
 - This is the least preferred method due to the potential for drop offs
- Click Job Duration at the bottom of the screen
- Choose how long you wish your posting to be published for.
 - If this screen shows \$100 dollars for a 30-day listing, STOP, don't continue and request membership access.
 - Choose if you wish to “feature your posting”. Featured postings will be further amplified and promoted by PHA. PHA is an **extension** of your current recruitment processes.
